

SUMMARY

Full-Stack Developer with hands-on experience building web-based systems using Laravel and Vue. Skilled in developing database-driven applications, authentication systems, and real-world solutions for academic and institutional use. Experienced in project-based freelance development and school projects.

WORK EXPERIENCE

Provincial Information Management Office

February 2026 - April 2026

Junior Web Developer Intern (Ojt)

- Core Task:** Led the development of a web-based system to automate the Procurement Market Scoping process, including data collection, supplier analysis, and document generation aligned with government procurement workflows.
- Key Contribution:** Designed and implemented an AI-assisted module for generating Terms of Reference (TOR) and market analysis reports, improving efficiency, consistency, and reducing manual workload. Built **RESTful APIs** using **ASP.NET Core** and integrated a dynamic frontend using **Vue.js**.
- Collaboration:** Collaborated closely with the IT Head to gather system requirements and ensure alignment with procurement standards (PGAS). Worked with the Database Administrator to design and maintain accurate, efficient data structures. Coordinated with developers and end-users to test, refine, and successfully deploy system functionalities

Freelance Full-Stack Developer

October 2025 - November 2025

ASSCAT Campus Navigator

- Core Task:** Developed a web-based campus navigation system to help users locate buildings, offices, and facilities within the ASSCAT campus.
- Key Contribution:** Designed and implemented interactive navigation features, including dynamic mapping, searchable locations, and route guidance. Built a seamless full-stack application using **Laravel** for backend logic and **Vue.js** with **Inertia.js** for a responsive user experience.
- Collaboration:** Worked with stakeholders to gather campus layout data and user requirements. Coordinated with team members to validate navigation accuracy and improve usability.

EDUCATION

St. Francis Xavier College - (2022-2026)

Bachelor of Science in Information Technology

- Relevant Coursework:** Software Engineering, Database Management, Web Development, Cybersecurity.

COMPETITIONS & ACHIEVEMENTS

Hack4Gov (Capture-the-Flag) | Participant

- Competed in a regional-level cybersecurity challenge focusing on digital forensics, cryptography, and web exploitation.

PSITE Regional Programming Competition | Participant

- Represented the institution in a high-pressure coding environment, solving complex algorithmic problems under strict time constraints.

SKILLS

- Web Development:** HTML, CSS, JavaScript, jQuery, Vue, Tailwind
- Mobile Development:** Kotlin, Flutter
- Security Tools:** Burp Suite, Postman, Linux Commands, Kali Linux
- Programming:** Java, Python, PHP, Dart, C#
- Frameworks & Tools:** ASP.NET, Laravel, Git, GitHub
- Databases:** MySQL, Firebase ,Supabase, SqlServer
